English - C2

German - A2

HOBBIES

TTRPGs / Board Games **Music/Guitar**

Video Production **Tennis**

Hiking **Wood Carving**

EXPERIENCE

2024+Present - VOID Software

Software development for 3D printing. Responsibilities include UI/UX, 3D interactions, and complex algorithms. Developed using Java and JavaFX for multi-OS desktop.

2024 - Hat Boy: Exploration/Narrative Micro-Game

Micro game for the Nintendo GameBoy. Designed, created art, wrote narrative. Developed in GB Studio in 2 weeks. Released on itch.io.

2023+Present - Grotto Builders!

A deck builder, deck explorer, and card explorer for the hit card game **Grotto Beasts!**. Continuously updated with fixes and new features to this day - like a pack opening simulator. Actively used by hundreds of players. Programmed and designed by me. Built with SvelteKit and PocketBase. Available at grotto.builders.

2023 - Chroma Mancer: Graduation Game Project

Designed and programmed mechanics, skills, enemies, weapons, upgrades. Designed UI and sprite art. Developed in 4 months in Unity. Released on chroma-mancer.com

2021 - Currency Thing Discord Bot

A currency back by Discord messages, inspired by Bitcoin. The blockchain is a Discord text channel of transactions. Programmed in Python. Released on [Discord](https://discord.com).

2021 - Currency Thing Blockchain Explorer

Blockchain explorer for the Currency Thing blockchain built using Flask, SvelteKit, and SASS. Available at currencything.com.

All my web projects are self-hosted on a Linux VM.
